

CAMBRIDGE FINE FURNISHINGS COURSE INFORMATION

CUSHIONS

Imagination, back with sound sewing techniques is the key to creating exciting one-off designer cushions. On this one day course you will learn the skills needed to cut, piece and fasten two different styles of cushions. There will be a general discussion of the use of different materials and trimmings to create interesting and innovative designs.

Two cushions will be completed. The first, a piped, square cushion with zip fastening to master the necessary skills, and after lunch a bolster cushion with sunburst ends with button ends and zip fastening.

Notes are also given for a variety of other cushions, and excellent books are available to purchase in class.

All materials are provided on the course, including cushion pads. There will be a wide variety of wonderful fabrics available, but if you would like to bring your own, please bring a metre with half a metre for piping.

EQUIPMENT REQUIRED

A sewing machine with zipper/piping/cording foot: sewing machine needles; sharp scissors; basic sewing kit and calculator.

All sundries can be purchased in class
